Access the inaccessible®

Accessing the inaccessible — it's an almost routine feat for many professionals that use our products. And it's an honor for Petzl to contribute to their work! In this second edition of the Workbook for Operators, we're presenting our entire product range for professionals who work in climbing gyms, adventure parks, on via ferratas, or as canyoning guides. Grounded in more than fifty years of experience, we design, manufacture, and provide products that are built to meet your needs, and to be the most functional and reliable products on the market. Our goal is to make every task you perform on the job more efficient.

In 2023, there are a number of new products, including two SIMBA harnesses; the PARK version for adventure parks, and the CLIMBING version for climbing. New versions of the BOREO CLUB and CUSTOM helmets are also making their debut, offering even more comfort for customers and practical features for professionals. Change is in the air for carabiners as well, with an updated DJINN and an all-new SPIRIT. As for the DJINN AXESS and SPIRIT EXPRESS quickdraws, a new 25 cm length will be available. To top it all off, the all-new ARIA headlamps are joining the lighting range, offering a compact, high-performance lighting solution that's ideal for professionals!

We wish you happy reading, and most importantly, success in your business.

We
are **PETZL.**

This is
how we **see the world.**

We are committed to **creating safer places.**

For those who **work and play**
in the vertical and dark worlds.

For those who want **to access**
their own inaccessible every day.

We are **independent** and completely
free to choose our own endeavors.

To maintain **industrial excellence**,
paying attention to our impact.

To be pioneers in the pursuit of
perpetual innovation.

Sharing, educating, building. **Together.**

This is
how we **see the world.**

We
are **PETZL.**

Access the inaccessible[®]

“Accessing the inaccessible” is the driving force behind everything you do, whether you are moving towards a summit or descending into darkness. You’re determined to get to ever-greater heights and through ever-deeper shadows. And you’re always searching for better tools to do it: tools with superior performance, tools that are more reliable, tools so comfortable and ergonomic that they disappear into your hand. At Petzl, we share your determination. We’ve built our entire design and manufacturing philosophy around exceeding your needs in the field. It’s what we’ve been doing for 50 years, and what we’ll continue to do for years to come.

Petzl Across the Globe

Petzl is a family business that, over the years, has become the largest European manufacturer of personal protective equipment for those who work and play in darkness or at height. All of our products are invented and developed at our headquarters in the heart of the French Alps.

Key Stats

The brand is present in over **55** countries

85% of sales are made internationally

More than **7** million products are sold every year

10 000 000 people use Petzl personal protective equipment every day

An International Presence

- Headquarters in the French Alps, in the town of Grenoble
- American subsidiary in Salt Lake City, Utah
- European subsidiaries and sales agencies: Austria, Germany, Benelux, Italy, Scandinavia, Spain, Switzerland, UK

1000 employees across the globe

4 production sites, 3 in France and 1 in Malaysia

●● Petzl subsidiaries and sales agencies: Austria, Benelux, Denmark, Finland, France, Germany, Italy, Norway, Spain, Sweden, Switzerland, UK, USA.

●● Petzl Distributors

The Values That Motivate Us

For 50 years, Petzl has been built around four pillars, four fundamental values that motivate every decision we make: remaining a stable family business, encouraging innovation to imagine the best solutions, insisting on industrial excellence with the goal of zero defects, and remaining engaged with our communities by providing global best practices.

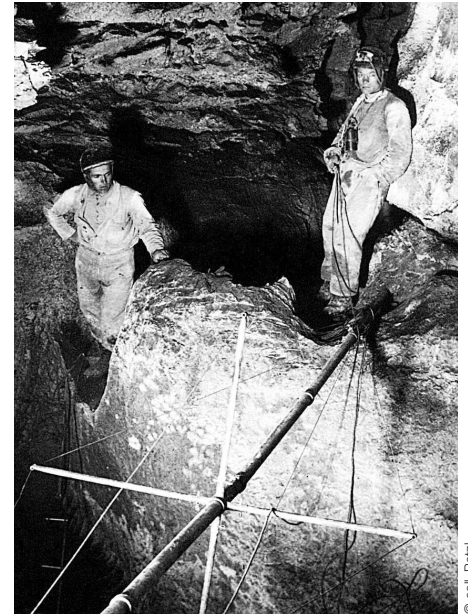

Learn more about each of our pillars.

1. Family Ownership

Sébastien, Paul, and Olivier Petzl

© coll. Petzl

Fernand Petzl and Daniel Gagneur in front of a scaling pole

© coll. Petzl

Fernand in his workshop

Our story begins in the 1930s in southeastern France

That was when craftsman Fernand Petzl was introduced to caving. Back at his workshop after each excursion to the depths, Fernand imagined new tools for exploring darkness and heights. In 1968, he marketed his first products; in 1970, Petzl was born.

For decades, the Petzl family has built a stable environment that fosters creative solutions and industrial excellence. The new generation is rooted in these principles and ready to make new discoveries.

The Petzl family business is not listed on the stock market. We're proud of our independence; we make our own choices, take responsibility for our decisions, and maintain a long-term, sustainable vision for the future. The confidence and satisfaction of our customers, our dealers, and our partners drives everything we do.

2. Innovative Spirit

Innovations That Challenge Convention

With the introduction of the first headlamp in 1973, the legendary GRIGRI assisted blocking belay device in 1991, and the MAESTRO rescue descender in 2019, Petzl ingenuity has always pushed standard practices forward. Since the creation of Petzl in 1970, our objective has always been to make progressing in dark or vertical spaces safer and more comfortable.

Going Farther

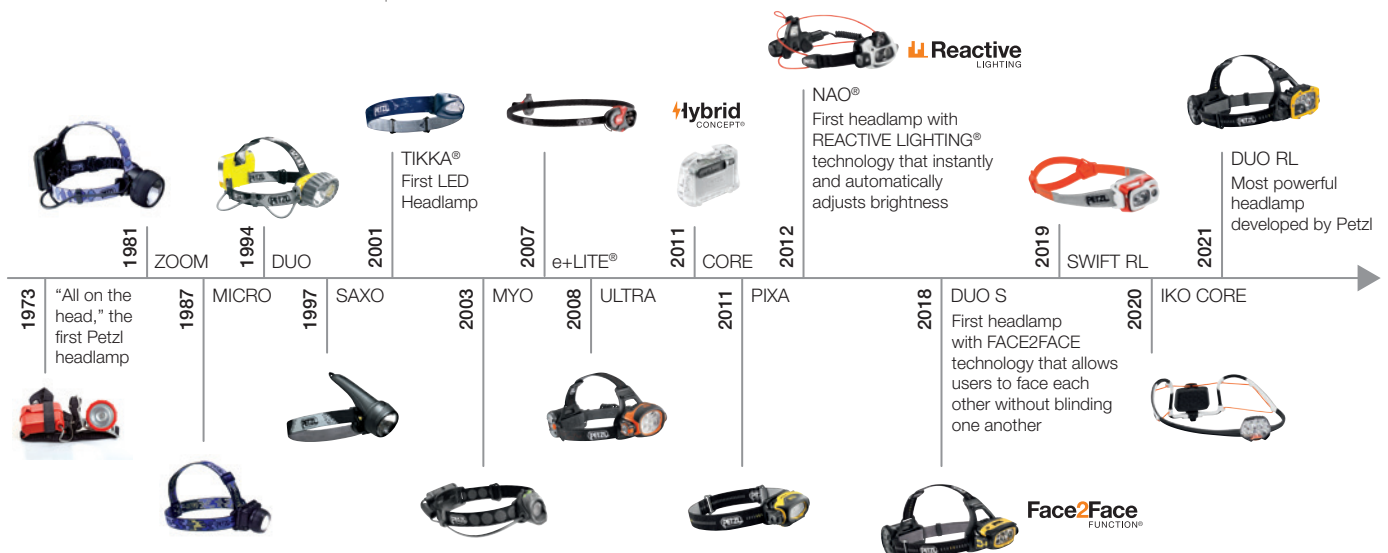

As passionate pioneers, we delight in creating new opportunities for our users to venture into ever more committing terrain — to go farther and higher, to work more efficiently, to maximize safety and to make what was inaccessible today accessible tomorrow.

Simplicity, Durability, Efficiency

The tools we make are conceived and constructed with an eye for simplicity, durability, and efficiency. For Petzl, being a pioneer has meant 50 years of passion, expertise, innovation, and continuous improvement. This approach to our craft and our business has allowed us to serve as a global expert, as we did in 2006 with the conception of the EXO personal escape system. At the request of, and in collaboration with, the firefighters of New York City, we were able to design an efficient solution that would allow easy escape in critical situations. It's an achievement that has been recognized with several awards, including best invention of the year by Time Magazine.

The Evolution of Petzl Headlamps

3. Industrial Excellence

© 2020 - Petzl Distribution - Stef Candès

Beyond the Standards

We have a deep responsibility to the people who trust us with their lives, and we develop, test, and qualify all of our products above required standards. Our design center, based in France, integrates all crafts that are related to the creation of products: mechanical, textile, electronic, optical, and technological. From the design and prototype phases, the reliability of a product and the safety of the user are continuously evaluated, with particular attention to risks of use.

With labs dedicated to product testing, we conduct dynamic fall and impact resistance tests, perform cyclical testing, and evaluate performance, as well as beam quality and burn times of our headlamps. This process includes rigorous field testing in order to test the ergonomics and reliability during real-world use.

© 2020 - Petzl Distribution - Stef Candès

Zero Defects - PPE (Personal Protective Equipment)

Reliability is at the center of our concerns: our goal is for our products to consistently function at the same level of excellence. Our objective is to allow zero defective products to leave our facilities, which involves processes with significant extra costs at every stage of production.

As we navigate an increasingly globalized economy, we go to great lengths to support our distributors and dealers, and we are heavily involved in the fight against counterfeit products.

Production and Inspection

Petzl's production sites are located in France, in the towns of Crolles, Eybens, and Rotherens, as well as in Rawang, Malaysia. Remaining competitive and keeping the majority of our production in France means that we continuously optimize our production lines and reduce our waste.

This production infrastructure is complemented by long-term partnerships with key suppliers in Europe and Asia.

Our purchasing and quality control teams work closely with suppliers, ensuring to the best of our abilities, product reliability and quality that meets or exceeds our strict requirements. Quality inspection is present throughout every step of the production process: machine inspection of operations, human inspection at key points, further reinforcement by error-proofing systems and final individual inspection of each product.

We regularly audit the methods, quality management systems, and CSR practices (Corporate Social Responsibility) of our suppliers and strategic partners, especially when it comes to their employees.

4. Community Engagement

Petzl Junior Rock Camp Germany © 2019 - Petzl Distribution - Julian Buckers

Using Our Expertise to Serve Communities

Sharing technical knowledge and appropriate product uses is at the heart of what we do at Petzl. We produce high-quality technical content that is available to everyone and utilized by the different communities that we serve. With a focus on maximizing safety, this content is updated and enriched throughout the lifetime of our products to keep our customers informed and moving forward while they practice their sport or do their job.

International Collaboration

Across the world, we have partnerships with iconic athletes, influential figures, professionals who work in extreme conditions, NGOs, certifying bodies, and training centers operated by leading experts in the field. These collaborations help us co-create a world where we can all learn, share, and flourish. They also make it easier to promote best practices and standard uses. At the heart of our collaborations is always a passion for exploration, for a job well done, and for the pursuit of the inaccessible.

The Petzl Foundation is an integral part of Petzl.

Through the Petzl Foundation, we support and initiate projects that help prevent accidents, preserve the environment, and improve knowledge of the natural world around us.

More information about the Petzl Foundation can be found on page 64.

End of a climbing day in the Gastlosen Range, Switzerland © 2019 - Petzl Distribution - Mathis Durmas

“More than ever before, we’re acutely aware that the choices we make today will have a lasting impact on the environment and will actively shape our own futures and the futures of our children. We’re committed to using our creativity and our capacity to innovate in service of sustainably reducing our impact in a continuous drive for improvement.”

Marie Pailler, CSR Manager and Sébastien Petzl, Director of CSR

Our approach to Corporate Social Responsibility (CSR) is pragmatic, collaborative, and positive. It’s built on concrete actions, feedback from our stakeholders, and is solution-oriented, to encourage our teams and community to take action.

The safety and satisfaction of our customers remains our top priority. Beyond that, however, we’re striving to create a more sustainable future.

Petzl has launched projects to improve our own economic, environmental, and social practices, as well as the practices of our suppliers in order to:

- Reduce our carbon footprint
- Improve the satisfaction of our employees
- Reduce, reuse, and recycle our waste
- Improve the labor conditions of our suppliers

Training at PETZL SOLUTIONS © 2020 - Petzl Distribution - Stef Candia

Petzl Solutions develops and shares Petzl's extensive expertise in terms of training, testing, and design of technical solutions, on an international scale. This department trains people involved with verticality on the advisement, usage, and management of Personal Protective Equipment (PPE). Our training centers also provide a venue for technical discussion on the use of our products. Our know-how allows us to provide technical responses to specific problems.

Petzl Solutions' expertise in a few words:

- In-depth knowledge of Petzl products and how to use them
- Petzl technical know-how
- Extensive proficiency in risk assessment
- Access to unique testing methods
- Create and offer training modules
- True teaching skills
- Share experiences from the field

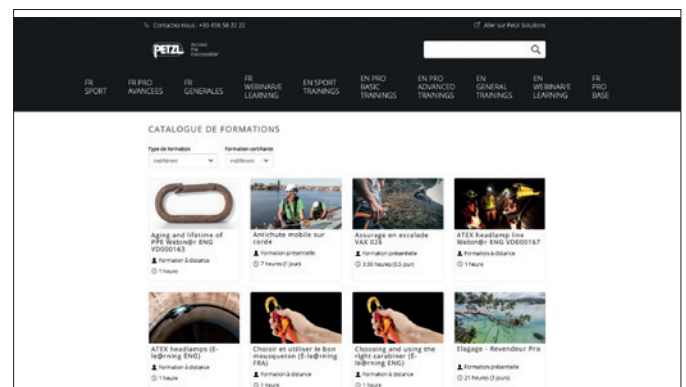

Training at PETZL SOLUTIONS © 2017 - Petzl Distribution - Larouche

A variety of content such as webinars and e-learning modules are already available on the website:

<https://petzl-training.catalogueformpro.com/>

Many other training sessions are distributed in-person via PTI (Petzl Technical Institute) and PTP (Petzl Technical Partner) networks.

To learn more about these trainings, contact a Petzl representative directly.

Combinations

Whether you're working at a climbing gym, adventure park, via ferrata, or as a canyoning guide, our goal is to make your job easier and provide gear that's designed for intensive client use. That's why we recommend specific product combinations — to help you get the most out of your gear. Of course, our range offers many other products that can be substituted to meet your specific needs.

Customized products and ready-to-use solutions

Petzl Custom is a service that allows you to customize certain products from our range. We're able to manufacture and assemble ready-made products to meet specific client and operator needs. Customizing colors can make it easier to identify client groups or adjust the size on a helmet, for example. Petzl Custom can customize PANGA, BOREO CLUB, VERTEX, and STRATO helmets, adventure park lanyards, and certain low-stretch and dynamic ropes, as well as the JAG RESCUE KIT.

To take advantage of Petzl Custom, simply contact your regular Petzl representative and place your order.

PANGA® and BOREO® CLUB Helmets

Petzl Custom can customize helmets, providing choice of shell color, size (BOREO CLUB), or pre-adjustment of the size around the head (PANGA). Stickers with a logo and/or personalized markings can be printed.

Product Specifications Page 30

Dynamic LEAD 9.8 mm Ropes and Low Stretch Kernmantle TOP 9.8 mm Ropes

Petzl Custom ropes are entirely customizable to respond to your structural needs. The ropes are available in three different colors and it is possible to customize the length, termination, and connectors.

Colors

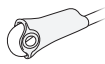

- LEAD 9.8 mm CUSTOM: Green, blue, or orange
- TOP 9.8 mm CUSTOM: Green, blue, or orange

Length

- Rope of a specified length can be ordered in one-meter increments, from 2 to 500 meters

Termination

- Option to add a manufactured sewn termination to limit the risk of manipulation error by the user:
 - On one end (LEAD 9.8 CUSTOM)
 - On one or both ends (TOP 9.8 mm CUSTOM)

- Choice of plastic sheath color: Gray or red

Connectors

For a ready-to-use solution, connectors can be pre-installed with the STUART accessory, which helps maintain the position of the connector.

- Rope attachment at the base of the route:

- For TOP 9.8 mm CUSTOM, connecting the climber:
RING OPEN + 2 Am'D TWIST-LOCK

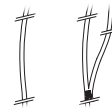

JOKO Adventure Park Lanyards

Petzl Custom can customize the lanyard's color and length, and offers a choice of a single or double arm. Choice of terminations and harness connection types are also possible. Connectors and TRAC trolleys can be pre-installed for a ready-to-use solution.

Versions

Single or double

Colors

Orange or black

Length

Lanyard of specified length can be ordered (in 5 cm increments, from 25 to 200 cm).

Terminations

- JOKO CUSTOM: Sewn termination or girth hitch
- JOKO ADJUST CUSTOM: Sewn termination, girth hitch, or ADJUST rope adjuster

- Choice of plastic sheath color (except for the red plastic sheath on the sewn terminations that have the ADJUST rope adjuster): Gray or green

Connection to the Harness

- JOKO CUSTOM: Small loop or girth hitch
- JOKO ADJUST CUSTOM: Small loop, girth hitch, or ADJUST rope adjuster

Connectors

For a ready-to-use solution, trolleys and connectors can be pre-installed.

- Terminations

- Connection to the harness

Minimum order of 5 lanyards

Harnesses

© 2019 - Petzl Distribution - Sam Blé

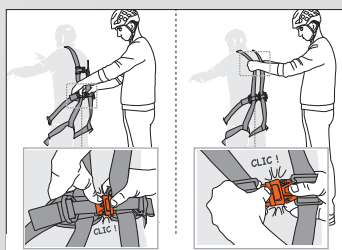

Built for group and intensive use, Petzl harnesses are designed to be durable and easy to use. They allow you to equip your clients whether it's for the climbing gym, via ferrata outings, canyoning, or adventure parks. They are easy to adjust and handle, making daily gear management easy.

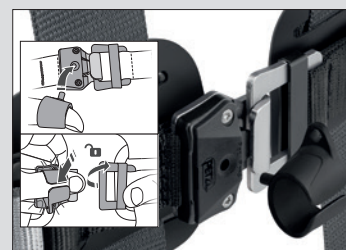

SWAN® EASYFIT STEEL

Durable, easy-to-use full-body harness for adventure parks

SWAN® EASYFIT STEEL is a full-body harness designed for adventure parks. The straps are color-coded to make donning easier. It is equipped with a FAST LT PIN-LOCK buckle to secure harness fastening; the PIN-LOCK locking system can only be opened by the guide with a special tool. The raised position of the connection point limits the risk of the client flipping. Its durability makes for easy maintenance and extended product life. It comes in a single size and has identification areas to simplify equipment inventory management.

Easy to put on the client, with FAST buckles at the rear of the harness.

The FAST LT PIN-LOCK waistbelt buckle can only be unlocked with a special tool, limiting the risk of the participant opening the buckle.

SWAN® FREEFALL STEEL

Durable, easy-to-use full-body harness with dorsal attachment point for adventure parks

SWAN® FREEFALL STEEL is a full-body harness designed for adventure parks. The straps are color-coded to make donning easier. The raised position of the connection point limits the risk of the client flipping. It also has a dorsal attachment point for belaying special adventure park activities such as freefall. Its durability makes for easy maintenance and extended product life. It comes in a single size and has identification areas to simplify equipment inventory management.

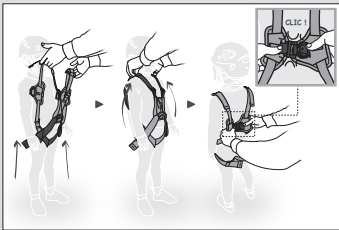

**NEW
2023**

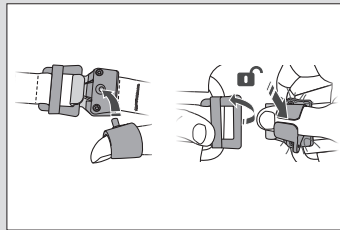

SIMBA PARK

Durable, easy-to-use full-body children's harness for adventure parks

Designed for children, SIMBA PARK is a full-body harness made for adventure parks. The rear buckle and color-coded webbing make donning easier. The FAST LT PIN-LOCK is situated on the back of the harness and can only be opened by a monitor with a special tool. The attachment point is positioned to increase comfort when moving, while limiting the risk of the child flipping over. Its durability makes for easy maintenance and extended product life. It comes in a single size and has identification areas to simplify equipment inventory management.

Easy to put on the child, with FAST LT PIN-LOCK buckle at the rear of the harness.

The FAST LT PIN-LOCK buckle can only be unlocked with a special tool, limiting the risk of the child unfastening the buckle.

The attachment point makes it easy to install the JOKO or AVENTEX lanyards and allows for a quick visual check. The attachment point is positioned to increase comfort when moving, while limiting the risk of the child flipping over.

**NEW
2023**

SIMBA CLIMBING

Durable, easy-to-use full-body children's harness for climbing

Designed for children, SIMBA CLIMBING is a full-body harness made for climbing. The rear buckle and color-coded webbing make donning easier. The FAST LT PIN-LOCK is situated on the back of the harness and can only be opened by a monitor with a special tool. The attachment point is positioned to increase comfort when climbing, while limiting the risk of the child flipping over. Its durability makes for easy maintenance and extended product life. It comes in a single size and has identification areas to simplify equipment inventory management.

The attachment point makes it easy to install connection systems and allows for a quick visual check. The attachment point is positioned to increase comfort when climbing, while limiting the risk of the child flipping over.

CANYON CLUB

Easy-to-use harness with integrated protective seat, for canyoning

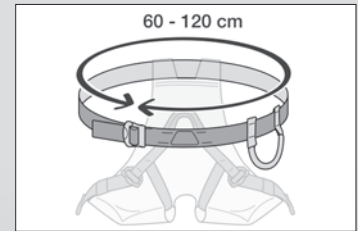

A simple solution for your first canyoning experience! Designed for group use or learning, the CANYON CLUB is a harness that's easy to put on and adjust. A single attachment point makes connecting gear quick and easy. It is durable and interchangeable, and its seat effectively protects the wetsuit and harness webbing from abrasion. The attachment point and gear loops are reinforced for excellent durability, even during intensive use. The identification panel is also reinforced so you can track the harness throughout its lifespan. Numerous accessories (protective seats in different colors, removable foam, and equipment holders) are available to personalize your equipment and improve comfort, depending on your needs.

Single attachment point with green color coding and a label to indicate where to connect, for efficient donning and quick visual check.

Reinforced gear loop to clip the DUAL CANYON CLUB lanyard carabiner, and secondary loops to quickly stow a descender.

Single size, adapts to most body types.

Helmets

© 2020 - Petzl Distribution - Lafouche - Idanaventure

Essential for activities at height, Petzl helmets are suited for regular and intensive use. Protective and durable, they are also comfortable and easy to adjust. Their design allows for simple maintenance and storage.

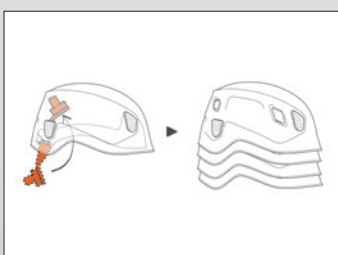

PANGA®

Easy-to-use and durable helmet (pack of 5)

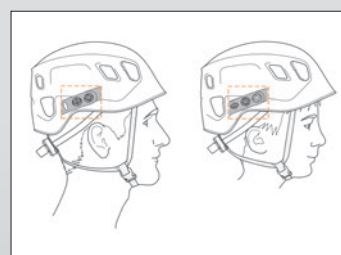

PANGA is a durable, easy-to-use helmet designed for group and club use. The FLIP&FIT system allows the headband to be positioned low on the head, offers a secure fit, and can be easily adjusted by the instructor or participant. The single-size helmet can be adjusted to fit smaller heads and makes equipment management easier. It features a thick shell designed to resist impacts and scratches. The headband folds away for protection during transport or storage. The headband is completely removable and interchangeable, making maintenance easier and optimizing its lifespan. PANGA is available in five colors and comes in packs of five.

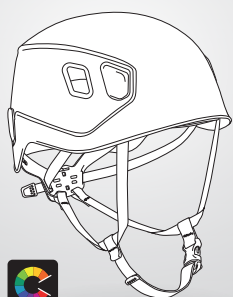

The headband is completely removable and interchangeable, making maintenance easier and optimizing its lifespan.

The FLIP&FIT system allows the headband to be positioned low on the head, allowing for a more secure fit. The system allows the headband size to be easily adjusted by an instructor or user.

Lateral adjustment allows the headband size to be reduced and makes it easier for smaller sizes to keep the helmet centered on the head.

PANGA® CUSTOM

Customizable PANGA helmet (pack of 5)

Petzl Custom offers customized PANGA helmets. They come in a choice of shell colors and include a pre-adjusted size option. Stickers with a logo and/or personalized markings can be printed.

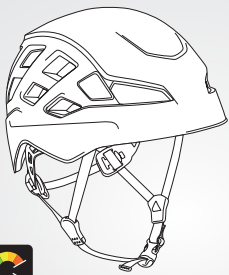

**NEW
2023**

BOREO® CLUB

Comfortable helmet with enhanced protection (pack of 5)

BOREO CLUB is a comfortable helmet designed for group activities. The fit and stability make it especially comfortable to wear during long activities. With hybrid construction, the helmet is low-profile while offering great coverage. It provides enhanced protection against lateral, frontal, and rear impact (Petzl's TOP AND SIDE PROTECTION label). The thick shell is designed to resist impacts and scratches. The headband folds away for protection during transport or storage. It is very easy to clean due to the closed-cell comfort foam that does not absorb water or sweat. BOREO CLUB is available in two sizes and comes in packs of five.

With a range of products designed for rock climbing, via ferrata, canyoning, and adventure parks, Petzl belay/rappel devices are great tools to help limit risk for your clients. With instructional markings, they are easy to install and can be used with different diameter ropes.

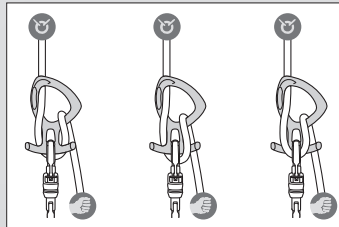

PIRANA CLUB

Adjustable friction descender for canyoning

For your first canyoning experiences! Designed for group use or learning, the PIRANA CLUB is an adjustable friction descender for canyoning. It has three rope installation options and allows you to adapt the degree of friction before initiating a descent. It works well when used right-handed or left-handed. The plastic ring makes rope installation easier, keeping the device connected to the harness and limiting the risk of dropping the device.

Plastic ring keeps the connector positioned properly to facilitate rope installation while the device is connected to the harness, limiting the risk of dropping the device.

Three rope installation options to select the degree of friction before initiating a descent.

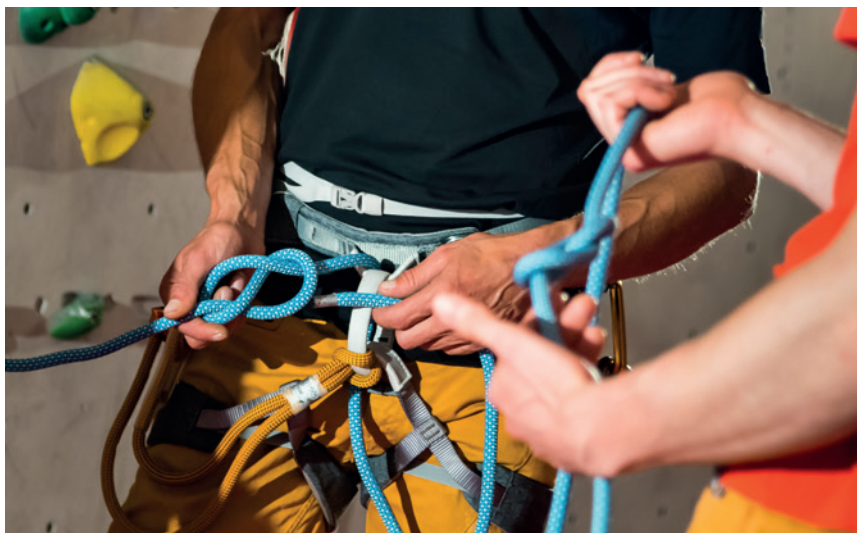

Sleek design to make instructions and visual inspections easier for the guide.

Petzl offers a choice of static, low stretch, and dynamic ropes, suited for a variety of activities in the gym, as well as outside, and designed to withstand intensive use.

LEAD 9.8 mm CUSTOM

9.8 mm diameter dynamic rope for lead and top rope climbing

The LEAD 9.8 mm CUSTOM dynamic rope is designed for top rope or lead climbing. The diameter and flexibility offer good handling for beginners and make it easy to use with belay devices. It is available in three colors. The length, terminations, and connectors are customizable to meet the precise needs of the structure. This rope is not suitable for permanent top rope climbing.

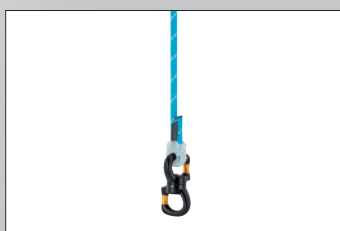

TOP 9.8 mm CUSTOM

9.8 mm diameter low stretch kernmantle rope for top rope climbing

The TOP 9.8 mm CUSTOM low stretch kernmantle rope is designed for continuous top rope use. Low rope stretch reduces the risk of a ground fall within the first few meters of climbing and makes it easier to take up slack when belaying. The diameter and flexibility offer good handling for beginners and make it easy to use with belay devices. It is available in three colors. Customized rope lengths can be ordered to correspond with the height requirements of the gym. This rope is not suitable for lead climbing.

Option to add a manufactured sewn termination on one or both ends, to help limit the risk of user error.

Termination with STUART accessory and SWIVEL OPEN, for attaching the rope at the base of the route.

Termination with the STUART accessory, a RING OPEN gated ring, two Ami'D TWIST-LOCK connectors equipped with CAPTIV positioning bars, allowing a climber to connect themselves.

Pulleys and Trolleys

© 2020 - Petzl Distribution - Lafouche

Trolleys for adventure parks, and pulleys for hauling heavy loads or performing a wself-rescue.

TRAC CLUB

Durable, easy-to-use trolley for adventure parks

TRAC CLUB is an easy-to-use trolley designed for adventure parks. Ergonomic and with excellent grip, the client can install the trolley on the cable with one hand. The ends are equipped with protective impact surfaces to reduce the risk of pinched fingers, and two connector support grooves to help avoid abrasion from the cable. The JOKO and AVENTEX lanyards and the trolley are directly integrated to reduce the risk of separation or loss. Product life is extended with extremely durable bearings and removable impact surfaces available as spare parts.

Excellent grip makes it comfortable for the client to use.

Two positioning support grooves for the connectors limit abrasion from the cable.

TRAC GUIDE

Trolley with optimal durability for adventure parks

TRAC GUIDE is a trolley designed for adventure parks. Featuring an ergonomic captive carabiner, it allows the guide or monitor to quickly install the trolley on the cable with one hand. Because the carabiner pivots, the trolley remains in position on the cable when it makes contact with the end brake of the zipline. The ends are equipped with protective impact surfaces to reduce the risk of pinched fingers, and two connector support grooves to help avoid abrasion from the cable. The JOKO and AVENTEX lanyards are directly integrated in the carabiner, limiting the risk of separation or loss.

The carabiner's reinforced construction provides greater resistance to damp and salty environments. Product life is extended with highly durable bearings and removable impact surfaces available as spare parts.

DUAL CANYON CLUB

Double lanyard for canyoning

Designed for canyoning, the DUAL CANYON CLUB is an easy-to-use lanyard for groups. It allows progression on a lifeline with intermediate anchors and positioning at an anchor. It attaches easily to the CANYON CLUB harness with a simple girth hitch. The plastic sheaths hold the carabiners in position and help protect the stitching from abrasion.

Attaches easily to the CANYON CLUB harness with a simple girth hitch.

Ends equipped with plastic sheaths to help hold the carabiners in place and protect the stitching from abrasion.

Petzl offers multiple anchors designed to equip your structures, inside or outside. Whether it's made of steel, multidirectional, in the form of a rigging plate or webbing, these products demonstrate a commitment to quality for your teams and clients.

TIPTOP STEEL

Durable carabiner for interior use (pack of 10)

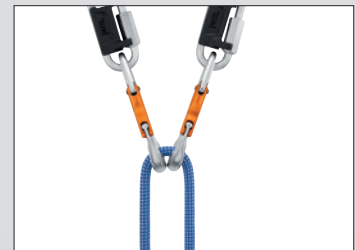

TIPTOP STEEL is a top anchor carabiner designed for indoor climbing gyms. Its aluminum gate and large opening make it easier to clip the rope. The steel frame offers great durability. It is easy to install on an existing anchor.

Aluminum gate gives it the feel of clipping a quickdraw.

The wide and rounded rope channel helps protect the rope.

To be installed on an existing anchor system with quick links (not included).

TIPTOP STAINLESS

Durable top anchor carabiner for exterior use (pack of 10)

TIPTOP STAINLESS is a top anchor carabiner designed for outdoor climbing walls. Its aluminum gate and large opening make it easier to clip the rope. The stainless steel frame and hard anodized gate optimize durability. It is easy to install on an existing anchor.

EASYTOP® STEEL

Ergonomic and durable top anchor carabiner for interior use

EASYTOP STEEL is a top anchor carabiner designed for indoor climbing gyms. The carabiner design makes clipping easy. The steel frame and the locking system are extremely durable. The inspection pin (included) allows operators to rapidly inspect the function and wear of the equipment.

Clipping is smooth and easy.

The wide and rounded rope channel helps protect the rope.

Function and wear inspection is quick and easy, thanks to an inspection pin (included).

As a result of many years of experience in the field, Petzl offers an innovative range of packs and accessories for climbing, canyoning, hauling, or transporting equipment.

ALCANADRE CLUB 30

Easy-to-use canyoning pack

Ready to help you discover incredible canyons! Designed for group use or learning, the ALCANADRE CLUB is an easy-to-use 30-liter pack. Padded shoulder straps offer great comfort during the approach. The large opening makes it easy to store and remove the rope. Numerous drain holes easily evacuate water. Inside, three color-coded loops allow you to attach the rope ends and rescue equipment. On each shoulder strap, buckles allow you to quickly release the pack in an emergency situation. Its construction and reinforced upper handle provide additional durability.

Drain holes in sides and bottom evacuate water efficiently.

Three color-coded loops inside the pack for attaching the rope ends and rescue equipment.

Multi-position webbing allows the pack to be tethered efficiently in different situations.

ALCANADRE GUIDE 45

Ergonomic and comfortable canyoning pack

The key to carrying everything you need! ALCANADRE GUIDE is a 45-liter canyoning pack designed for independent users and guides. With generous padding, it provides optimal comfort during approaches or while moving through the canyon. Numerous drain holes easily evacuate water. It has two colored loops for attaching the rope ends, a removable waistbelt, and buckles on each shoulder strap quickly release the pack in an emergency situation. Inside, two compartments give you direct access to a waterproof container and to the rope, a flat pocket for rescue equipment, and a mesh pocket for storing small items. Its construction and reinforced upper handle provide additional durability.

YARA CLUB 15

Small-capacity rope bag for canyoning

YARA CLUB 15 is a small-capacity canyoning rope bag designed for groups. It can transport a rope, keep it from tangling with other equipment, and facilitate maneuvers at the anchor or when installing a fixed line. The padded back provides buoyancy, while the removable shoulder straps and two handles improve handling. Multiple drain holes optimize water evacuation. Its construction and reinforced upper handle provide additional durability.

Drain holes in sides and bottom evacuate water efficiently.

Two color-coded loops inside the bag for attaching the rope ends.

Molded upper handle and front handle make it easy to throw and pass the bag.

YARA GUIDE 25

Medium-capacity rope bag for canyoning

YARA GUIDE 25 is a medium-capacity canyoning rope bag designed for independent users and guides. It can transport a rope, keep it from tangling with other equipment, and facilitate maneuvers at the anchor or when installing a fixed line. The padded back provides buoyancy and two handles improve handling. Multiple drain holes optimize water evacuation. Its construction and reinforced upper handle provide additional durability.

Drain holes in sides and bottom evacuate water efficiently.

Two color-coded loops inside the bag for attaching the rope ends.

Molded upper handle and front handle make it easy to throw and pass the bag.

Exploring New Horizons

Whether climbing a distant summit or exploring the depths below, our desire to access the inaccessible inspires an enduring passion to fulfill our dreams. For over 15 years, the Petzl Foundation's mission has been to support and initiate public interest projects through its activities in mountainous and vertical domains; projects that help bring balance to humankind's place in our natural, cultural, and economic environments.

Mont Blanc Massif — Restoration of a Historic Mountain Refuge

Until 1973, mountaineers attempting to climb the Grépon departed from the bivouac at Tour Rouge, which sat on a ledge at an altitude of 2,820 meters. With room for eight, this small shelter made it possible to climb the first delicate pitches at first light, and then descend the Nantillons glacier in better conditions during the day.

On July 21, 2021, more than 50 years after a large snow mass caused the refuge to collapse, it was reconstructed with the help of a volunteer group of alpinists guided by Jean-Sébastien Knoertzer. The refuge is now equipped with mattresses, blankets, dishes, and gas. A new route to access the refuge has been established to climb the smooth slabs uncovered due to glacial retreat. The guidebook is available through the accident prevention association, La Chamoniarde. The total budget for the operation, €16,000, was raised with the help of many donors, including the Petzl Foundation.

This ambitious project follows the reconstruction of the neighboring Périades bivouac, carried out in 2020. There are a number of these small bivouacs on the Italian side of the Mont Blanc massif, but they're more rare on the French side. Strategically placed in isolated spots along challenging routes, they offer small islands of refuge, much appreciated by the alpinists that use them. They also offer passionate alpinists the autonomous ascents they crave, totally immersed in the wild and natural landscapes that surround them.

Plans have been made to rebuild the Craveri bivouac on the Peuterey Integrale, the Canzio bivouac on the Grandes Jorasses traverse, and the Charpoua bivouac.

petzdealer.com

Place your order, find and download product information easily:

petzdealer.com, the site for operators

Easy access to all our offerings:

- Navigate easily and intuitively
- Direct access to our latest products

Manage your products down to the smallest detail:

- Comprehensive information on each product
- Documents to inform and advise your clients

Order with complete peace of mind:

- Thee direct access points to order your products
- Absolute pricing transparency
- Real-time status of Petzl inventories

Track your orders:

- Precise status of your current orders
- Personalized order tracking

Download product information and related news

Quickly find your choice of Petzl information for download: notices, photos, brochures, and more.
