inaccessible®

Access the inaccessible®

Accessing the inaccessible — it's the greatest promise we make to our customers, users, and the professionals who put their trust in us. In this year's Workbook for Operators, we're presenting a complete and detailed breakdown of the products we design and build specifically for professionals who work in climbing gyms, adventure parks, on via ferratas, or as canyoning guides. With more than fifty years of experience and know-how, we design and manufacture products that are built to meet your needs, and to be the most functional and reliable products on the market. Our goal is to make every task you perform on the job more efficient.

In 2026, we're introducing new products for adventure parks, with an updated range of PANDION harnesses and a new, comfortable sit harness, the TETRAX. Beyond this year's new products, our full range has been carefully designed for professionals like you — we're proud to share it.

We hope you enjoy reading this new workbook and, above all, wish you success in your work.

We are **PETZL.**
This is how we see the world.

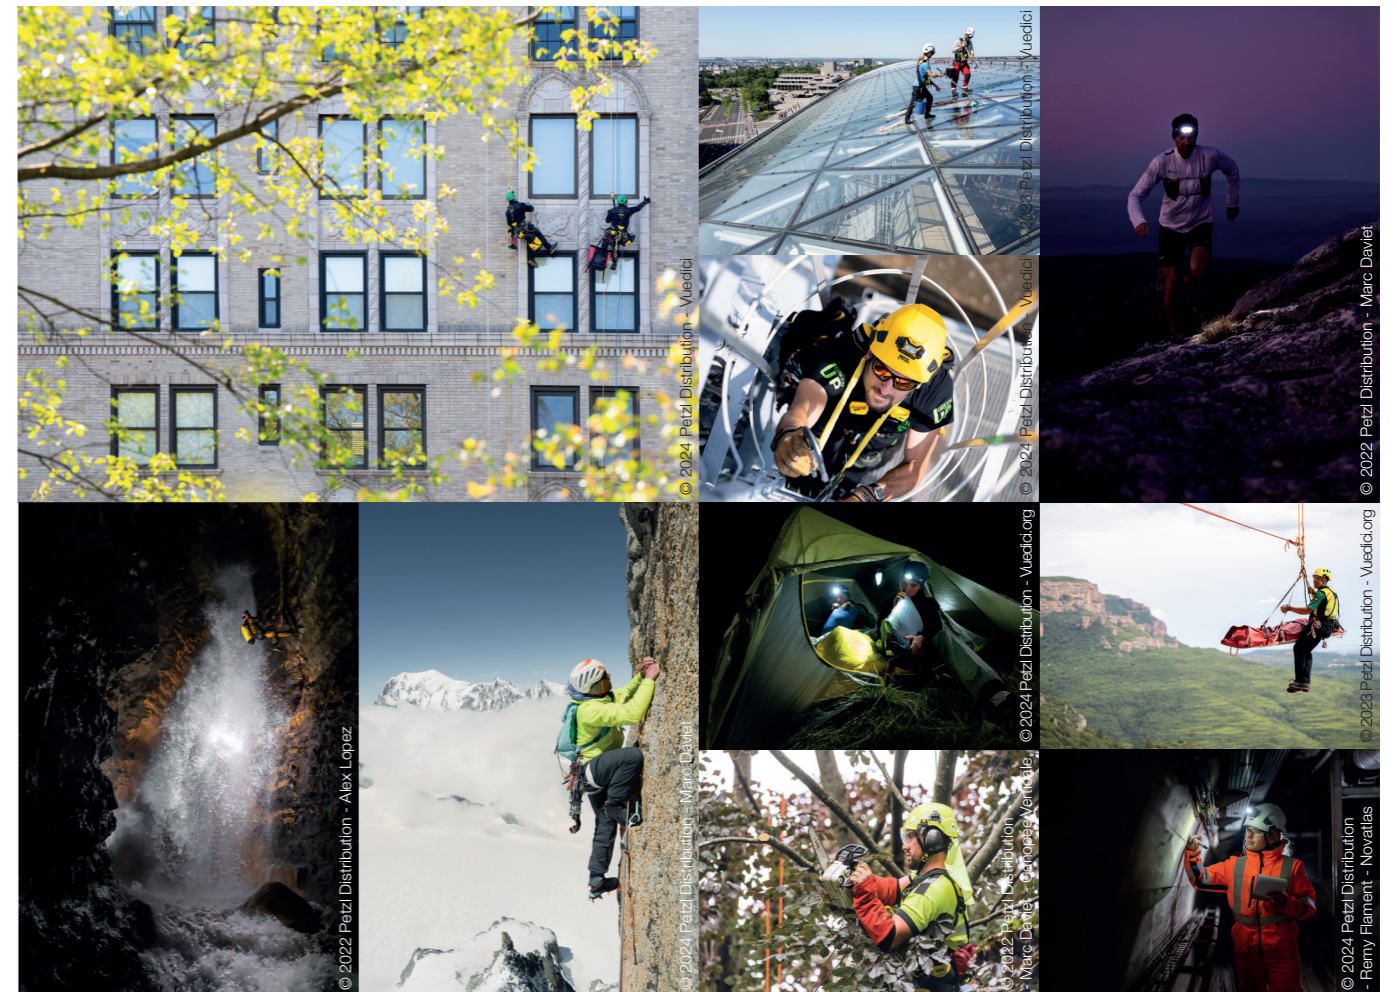

We are committed to **creating safer places.**
For those who **work and play** in the vertical and dark worlds.
For those who want **to access their own inaccessible** every day.
We are **independent** and completely free to choose our own endeavors.
To maintain **industrial excellence**, paying attention to our impact.
To be pioneers in the pursuit of **perpetual innovation.**
Sharing, educating, building. **Together.**

This is how we see the world.
We are **PETZL.**

Access the inaccessible®

“Accessing the inaccessible” is the driving force behind everything you do, whether you are moving towards a summit or descending into darkness. You’re determined to get to ever-greater heights and through ever-deeper shadows. And you’re always searching for better tools to do it: tools with superior performance, tools that are more reliable, tools so comfortable and ergonomic that they disappear into your hand. At Petzl, we share your determination. We’ve built our entire design and manufacturing philosophy around exceeding your needs in the field. It’s what we’ve been doing for 50 years, and what we’ll continue to do for years to come.

Petzl is a family business that, over the years, has become the largest European manufacturer of personal protective equipment for those who work and play in darkness or at height. All of our products are invented and developed at our headquarters in the heart of the French Alps.

The Values That Motivate Us

For 50 years, Petzl has been built around four pillars, four fundamental values that motivate every decision we make: remaining a stable family business, encouraging innovation to imagine the best solutions, insisting on industrial excellence with the goal of zero defects, and remaining engaged with our communities by providing global best practices. Learn more about each of our pillars.

1

Family Ownership

Sébastien, Paul, and Olivier Petzl

Fernand Petzl and Daniel Gagneur in front of a scaling pole

Our story begins in the 1930s in southeastern France
That was when craftsman Fernand Petzl was introduced to caving. Back at his workshop after each excursion to the depths, Fernand imagined new tools for exploring darkness and heights. In 1968, he marketed his first products; in 1970, Petzl was born. For decades, the Petzl family has built a stable environment that fosters creative solutions and industrial excellence. The new generation is rooted in these principles and ready to make new discoveries.

The Petzl family business is not listed on the stock market. We're proud of our independence; we make our own choices, take responsibility for our decisions, and maintain a long-term, sustainable vision for the future. The confidence and satisfaction of our customers, our dealers, and our partners drives everything we do.

Fernand in his workshop

Innovative Spirit

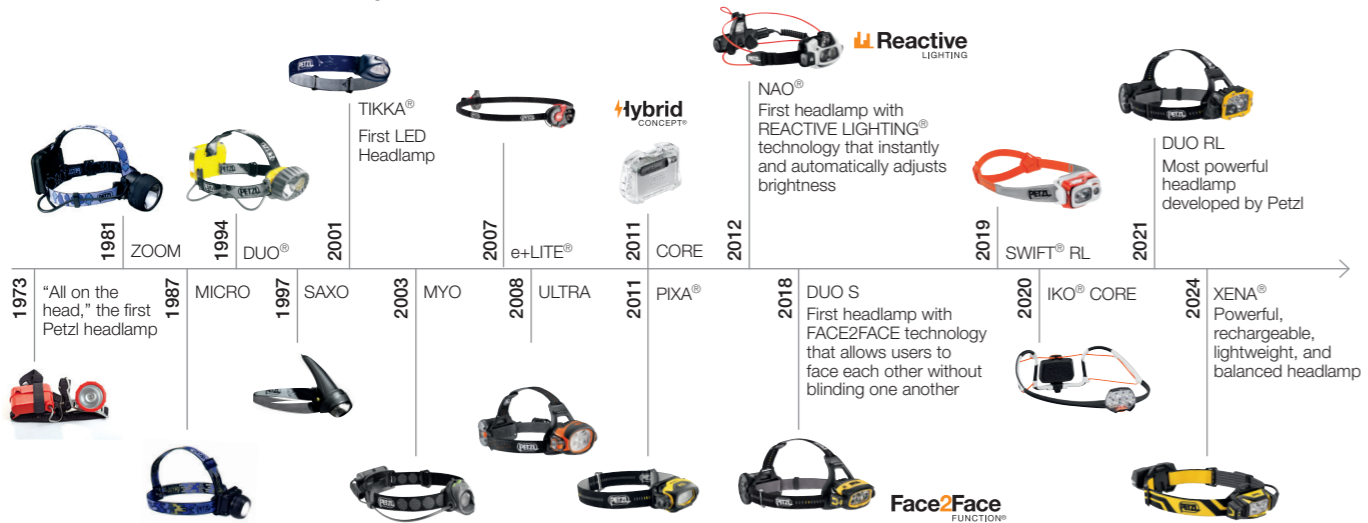

Innovations That Challenge Convention
 With the introduction of the first headlamp in 1973, the legendary GRIGRI assisted blocking belay device in 1991, and the MAESTRO rescue descender in 2019, Petzl ingenuity has always pushed standard practices forward. Since the creation of Petzl in 1970, our objective has always been to make progressing in dark or vertical spaces safer and more comfortable.

Going Farther
 As passionate pioneers, we delight in creating new opportunities for our users to venture into ever more committing terrain — to go farther and higher, to work more efficiently, to maximize safety and to make what was inaccessible today accessible tomorrow.

Simplicity, Durability, Efficiency
 In every tool we design and construct, we prioritize simplicity, durability, and efficiency. For Petzl, being a pioneer has meant 50 years of passion, expertise, innovation, and continuous improvement. This approach to our craft and our business has allowed us to serve as a global expert, as we did in 2006 with the conception of the EXO personal escape system. At the request of, and in collaboration with, the firefighters of New York City, we were able to design an efficient solution that would allow easy escape in critical situations. It's an achievement that has been recognized with several awards, including best invention of the year by Time Magazine.

The Evolution of Petzl Headlamps

Industrial Excellence

Beyond the Standards
 We have a deep responsibility to the people who trust us with their lives, and we develop, test, and qualify all of our products above required standards. Our design center, based in France, integrates all crafts that are related to the creation of products: mechanical, textile, electronic, optical, and technological. From the design and prototype phases, the reliability of a product and the safety of the user are continuously evaluated, with particular attention to risks of use.

With labs dedicated to product testing, we conduct dynamic fall and impact resistance tests, perform cyclical testing, and evaluate performance, as well as beam quality and burn times of our headlamps. This process includes rigorous field testing in order to test the ergonomics and reliability during real-world use.

Zero Defects - PPE (Personal Protective Equipment)
 Reliability is at the center of our concerns: our goal is for our products to consistently function at the same level of excellence. Our objective is to allow zero defective products to leave our facilities, which involves processes with significant extra costs at every stage of production.

Production and Inspection
 Petzl's production sites are located in France, in the towns of Crolles, Eybens, and Rotherens, as well as in Rawang, Malaysia. Remaining competitive and keeping the majority of our production in France means that we continuously optimize our production lines and reduce our waste. This production infrastructure is complemented by long-term partnerships with key suppliers in Europe and Asia.

As we navigate an increasingly globalized economy, we go to great lengths to support our distributors and dealers, and we are heavily involved in the fight against counterfeit products.

Our purchasing and quality control teams work closely with suppliers, ensuring to the best of our abilities, product reliability and quality that meets or exceeds our strict requirements. Quality inspection is present throughout every step of the production process: machine inspection of operations, human inspection at key points, further reinforcement by error-proofing systems and final individual inspection of each product.

We regularly audit the methods, quality management systems, and CSR practices (Corporate Social Responsibility) of our suppliers and strategic partners, especially when it comes to their employees.

Community Engagement

© 2024 Petzl Distribution - Petzl Rope Trip APAC Edition - Rockcamp International Co., Ltd

Using Our Expertise to Serve Communities

Sharing technical knowledge and appropriate product uses is at the heart of what we do at Petzl. We produce high-quality technical content that is available to everyone and utilized by the different communities that we serve. With a focus on maximizing safety, this content is updated and enriched throughout the lifespan of our products to keep our customers informed and moving forward while they practice their sport or do their job.

International Collaboration

Across the world, we have partnerships with iconic athletes, influential figures, professionals who work in extreme conditions, NGOs, certifying bodies, and training centers operated by leading experts in the field. These collaborations help us co-create a world where we can all learn, share, and flourish. They also make it easier to promote best practices and standard uses. At the heart of our collaborations is always a passion for exploration, for a job well done, and for the pursuit of the inaccessible.

The Petzl Foundation, An Integral Part of Petzl

Through the Petzl Foundation, we support and initiate projects that help prevent accidents, preserve the environment, and improve knowledge of the natural world around us.

More information about the Petzl Foundation can be found on page 76.

For 50 years, Petzl has been built around four pillars, four fundamental values that motivate every decision we make: remaining a stable family business, encouraging innovation to imagine the best solutions, insisting on industrial excellence with the goal of zero defects, and remaining engaged with our communities by providing global best practices. "Urgency drives us to innovate and rethink our processes. By fostering creativity and showing resilience, we can collectively find new paths — ones that are more in harmony with the world around us."

Sébastien Petzl, Director of CSR

Our approach to CSR is pragmatic, collaborative and positive. It's built on concrete actions, feedback from our stakeholders, and is solution-oriented, to encourage our teams and community to take action.

The safety and satisfaction of our customers remains our top priority. Beyond that, we're striving to create a more sustainable future. Petzl has launched projects to improve our own economic, environmental, and social practices, as well as the practices of our suppliers in order to:

- Reduce our carbon intensity
- Reduce, reuse, and recycle our waste
- Improve our employee satisfaction
- Improve the labor conditions of our suppliers

Four Actionable Commitments

At Petzl, we're focused on four commitments that respond to the primary concerns of over 2,000 of our internal stakeholders (employees, subsidiaries, family shareholders) and external stakeholders (clients, users, suppliers, associations, and NGOs). We are manifesting these four commitments through hands-on projects with measurable outcomes.

1

Reduce Our Carbon Intensity

© 2024 Petzl Distribution - Litouche

In 2020, we worked with Carbone 4 to measure the comprehensive carbon impact of our operations in 2019 — from the extraction of raw materials to the end of a product's life. Our footprint was equal to 45,000 metric tons of CO₂. Three areas accounted for 75% of our emissions:

- Raw materials (34%)
- Transport of goods (24%)
- Energy used to power our headlamps (17%)

In 2021, we created initiatives to reduce our carbon footprint: prioritize the use of materials with the least impact, improve the durability and reparability of our products, shrink the distances our goods travel, and reduce our energy consumption. By 2030, our goal is to reduce our total carbon footprint by 50% per euro in sales.

2

Reduce, Reuse, and Recycle Our Waste

© 2023 Petzl Distribution - Stephane Candé

The waste from our industrial and commercial operations produces a variety of pollutants.

We're taking action in our factories, warehouses, and offices to reach three objectives by 2026:

- Eliminate single-use plastics in our packaging and supply chain
- Reuse 50% of our cardboard and pallets, recycle the rest
- Recycle 80% of our metal, plastic, cardboard and wood waste, put the rest towards energy recovery

3

Improve Our Employee Satisfaction

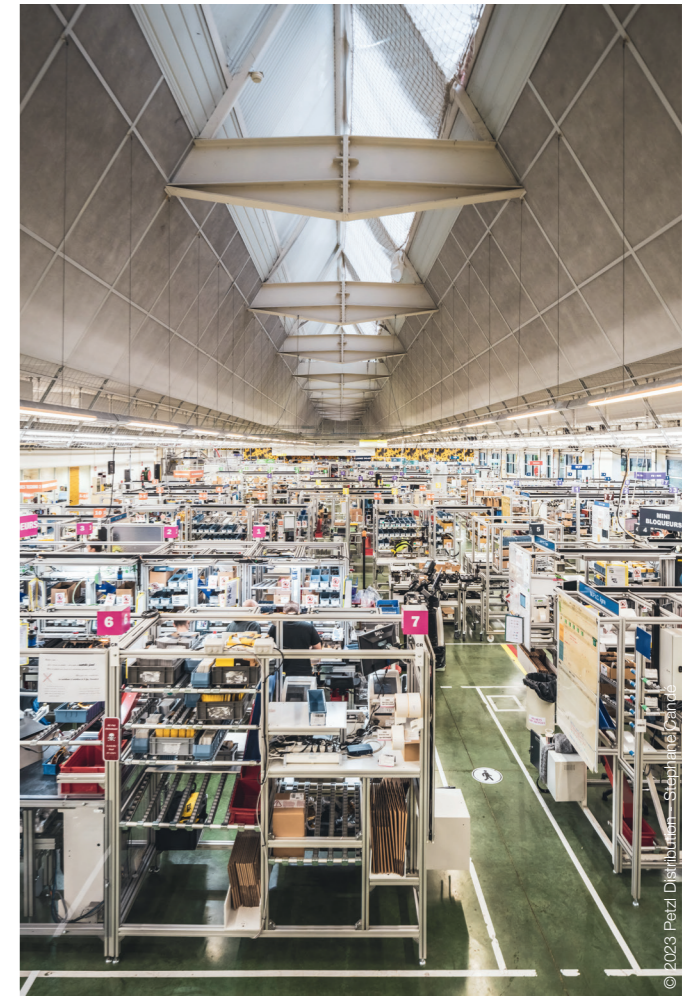

© 2023 Petzl Distribution - Stephane Candé

Our strong and consistent growth, coupled with the complex issues of the pandemic, has the potential to affect employee health. In 2021, we evaluated the satisfaction of all Petzl employees in France using the Wittyfit platform. The survey covers topics including organization and work load, autonomy, work/life balance, recognition, as well as purpose and values. Using the results, we created action plans to improve satisfaction — some carried out by leadership and others co-created and led by the teams. In 2023, this satisfaction audit was extended to all Petzl employees on a global level.

4

Improve the Labor Conditions of Our Suppliers

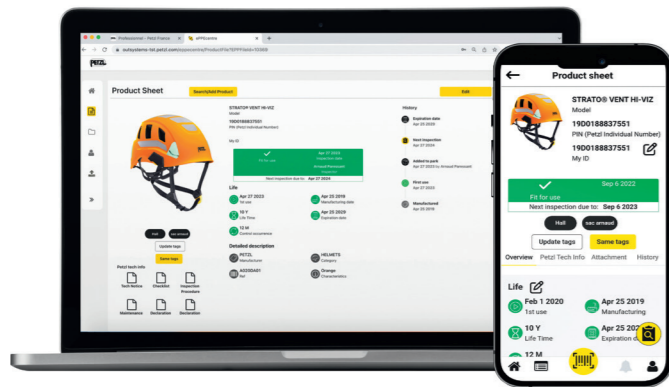

© 2023 Petzl Distribution - Stephane Candé

Since 2010, our responsible purchasing initiative has aimed to ensure that all our suppliers comply with the Petzl code of conduct. This code aligns with International Labor Organization (ILO) directives. Our objectives are to improve social, environmental, health, and safety practices at all of our suppliers. We've created an annual evaluation of CSR practices for suppliers representing 80% of our purchases. We've offered reinforced support for 25% of our suppliers in their continued improvement plans. We are also collaborating with other manufacturers to combine our audit efforts and reaffirm our CSR standards for common suppliers.

Save Time

Simplified Management of Your Petzl PPE

- Add a Petzl product by simply scanning its datamatrix: all the information in our database that is related to the product will automatically populate
- Add products from other brands, as well
- Add photos and comments for context and to better monitor inspections
- Easily import and export your existing PPE data

See Overview of PPE at Any Time

- See an overview of your PPE with one quick glance at the dashboard on the home page: see the number of current products organized by status and immediately view the number of PPE inspections that need to be carried out in the coming days, weeks, and months
- View product history from the date of manufacture
- Access your data on a mobile device by installing the app, or on a computer via the ePPEcentre website

Customize Your PPE Management

- Choose the option that makes sense for you and your business (STARTER/PROFESSIONAL/ENTERPRISE). With PROFESSIONAL and ENTERPRISE, manage employee access by creating user profiles for your team (administrator, manager, inspector, viewer)
- Use tags to organize your products however you see fit (by family, users, location of use, etc.)
- Customize how your product list is displayed

Try ePPEcentre

To access the web version, go to:

epecentre.petzl.com

To access the mobile app, install it via your app store:

Whether you're working at a climbing gym, adventure park, via ferrata, or as a canyoning guide, our goal is to make your job easier and provide gear that's designed for intensive client use. That's why we recommend specific product combinations — to help you get the most out of your gear. Of course, our range offers many other products that can be substituted to meet your specific needs.

Customized Products and Ready-To-Use Solutions

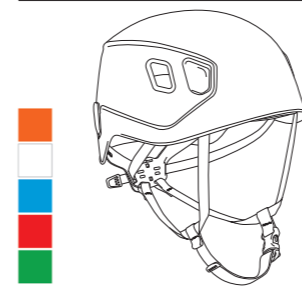

Petzl Custom is a service that allows you to customize certain products from our range. We're able to manufacture and assemble ready-made products to meet specific client and operator needs. Customizing colors can make it easier to identify client groups or keep track of different helmet sizes, for example. Petzl Custom can customize PANGA, BOREO CLUB, VERTEX, and STRATO helmets, adventure park lanyards, and certain low-stretch and dynamic ropes, as well as the JAG RESCUE KIT.

To take advantage of Petzl Custom, simply contact your regular Petzl representative and place your order.

PANGA® and BOREO® CLUB Helmets

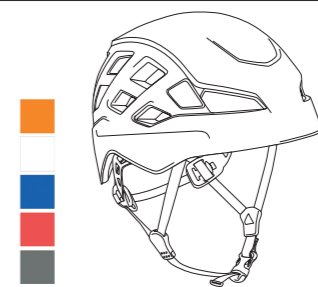

Petzl Custom can customize helmets, providing choice of shell color, size (BOREO CLUB), or pre-adjustment of the size around the head (PANGA). Stickers with a logo and/or personalized markings can be printed.

PANGA® CUSTOM

Built for group and intensive use, Petzl harnesses are designed to be durable and easy to use. They allow you to equip your clients whether it's for the climbing gym, via ferrata outings, canyoning, or adventure parks. They are easy to adjust and handle, making daily gear management easy.

PANDION STEEL

Easy-to-use and durable sit harness for group use
 Designed for group use, the PANDION STEEL is an adjustable and durable harness. It features a single attachment point, making it easier to set up belay systems and allowing for a quick visual check. The reinforced attachment point and thick webbing make it very durable for intensive use. Two gear loops allow users to carry equipment. Identification and marking areas simplify equipment inventory management.

PANDION STEEL LT

Easy-to-use and durable sit harness without gear loops, for group use
 Designed for groups, the PANDION STEEL LT is an adjustable and durable harness without gear loops. It features a single attachment point, making it easier to set up belay systems and allowing for a quick visual check. The reinforced attachment point and thick webbing make it very durable for intensive use. Identification and marking areas simplify equipment inventory management.

PANDION STAINLESS

Easy-to-use and durable sit harness for group use in humid and salty environments
 Designed for group use in humid and salty environments, the PANDION STAINLESS is an adjustable and extremely durable harness. It features a single attachment point, making it easier to set up belay systems and allowing for a quick visual check. Its reinforced attachment point, thick webbing straps, and stainless steel DOUBLEBACK buckles provide great durability for intensive use, especially in areas with high humidity. Two gear loops allow users to carry equipment. Identification and marking areas simplify equipment inventory management.

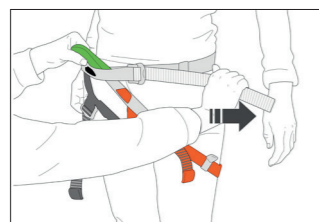

TETRAX

Comfortable, easy-to-use, and durable sit harness for group use
 The TETRAX is a comfortable, easy-to-use, and durable harness designed for group use. The waistbelt is equipped with sliding foam padding, providing comfort for a wide range of users. It features a single attachment point, making it easier to set up belay systems and allowing for a quick visual check. The reinforced attachment point and thick webbing make it very durable for intensive use. Two gear loops allow users to carry equipment. Identification and marking areas simplify equipment inventory management.

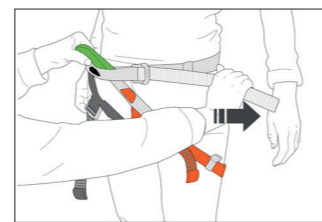

Gray/orange color coding on the leg loops makes it easier to give donning instructions to participants.

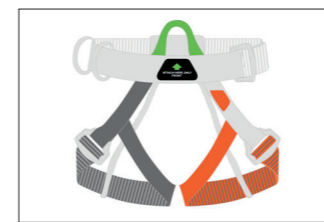

Quick and easy adjustment with DOUBLEBACK buckles.

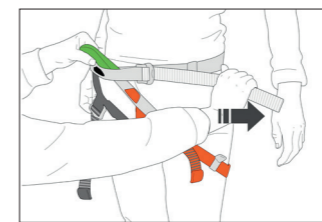

Gray/orange color coding on the leg loops makes it easier to give donning instructions to participants.

SWAN® EASYFIT STEEL

Durable, easy-to-use full-body harness for adventure parks

The SWAN EASYFIT STEEL is a full-body harness designed for adventure parks. The straps are color-coded to make donning easier. It is equipped with a FAST LT PIN-LOCK buckle to secure harness fastening; the PIN-LOCK locking system can only be opened by staff with a special tool. The raised position of the connection point limits the risk of the participant flipping. Its durability facilitates maintenance and optimizes lifespan. It comes in a single size and has identification areas to simplify equipment inventory management.

SWAN® EASYFIT STAINLESS

Durable, easy-to-use full-body harness for adventure parks in humid and salty environments

The SWAN EASYFIT STAINLESS is a full-body harness designed for adventure parks in humid and salty environments. The straps are color-coded to make donning easier. It is equipped with a FAST LT PIN-LOCK buckle to secure harness fastening; the PIN-LOCK locking system can only be opened by staff with a special tool. The raised position of the connection point limits the risk of the participant flipping. The stainless steel DOUBLEBACK buckles and thick webbing provide optimal durability for intensive use, including in areas with high humidity. It comes in a single size and has identification areas to simplify equipment inventory management.

SWAN® FREEFALL STEEL

Durable, easy-to-use full-body harness with dorsal attachment point for adventure parks

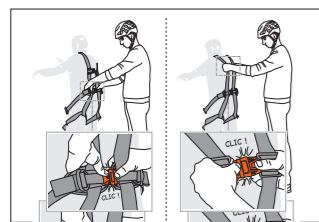

The SWAN FREEFALL STEEL is a full-body harness designed for adventure parks. The straps are color-coded to make donning easier. The raised position of the connection point limits the risk of the participant flipping. It also has a dorsal attachment point for belaying special adventure park activities such as freefall. Its durability facilitates maintenance and optimizes lifespan. It comes in a single size and has identification areas to simplify equipment inventory management.

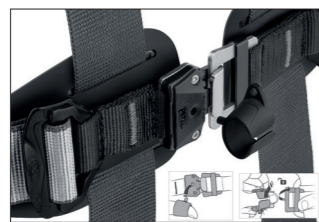

SWAN® FREEFALL STAINLESS

Durable, easy-to-use full-body harness with dorsal attachment point for adventure parks in humid and salty environments

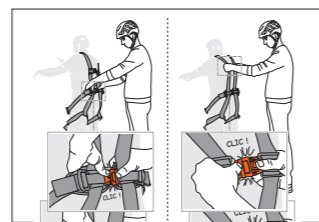

The SWAN FREEFALL STAINLESS is a full-body harness designed for adventure parks in humid and salty environments. The straps are color-coded to make donning easier. The raised position of the connection point limits the risk of the participant flipping. It also has a dorsal attachment point for belaying special adventure park activities such as freefall. The stainless steel DOUBLEBACK buckles and thick webbing provide great durability for intensive use, including in areas with high humidity. It comes in a single size and has identification areas to simplify equipment inventory management.

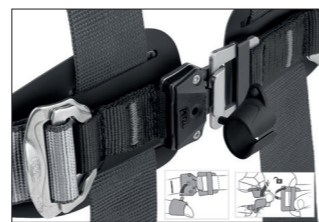

Easy to put on the participant, with FAST buckles at the rear of the harness.

The FAST LT PIN-LOCK waistbelt buckle can only be unlocked with a special tool, limiting the risk of the participant opening the buckle.

Easy to put on the participant, with FAST buckles at the rear of the harness.

The FAST LT PIN-LOCK waistbelt buckle can only be unlocked with a special tool, limiting the risk of the participant opening the buckle.

Self-locking DOUBLEBACK buckles allow for quick and easy harness adjustment. The excellent grip on the webbing ends makes adjustment easier, even with gloves on.

The wide ventral attachment point makes it easy to install the JOKO or AVENTEX lanyards and allows for a quick visual check. The raised position of the attachment point limits the risk of the participant flipping.

CANYON GUIDE

Comfortable, ergonomic harness with integrated protective seat for canyoning

Are you ready to rappel great vertical distances? Glide down natural slides and go from one waterfall to the next? The CANYON GUIDE is a comfortable and ergonomic canyoning harness designed for independent users and guides. The gated ventral attachment point allows gear to be easily connected (such as a lanyard, ascender, or cutaway sling). The gear loops and secondary loops make it easy to carry gear in a variety of situations (such as while progressing, organizing packs, or during rescue). Durable and interchangeable, the seat effectively protects your wetsuit and harness webbing from abrasion. The stainless steel DOUBLEBACK buckles, metal attachment point, and reinforced gear loops make the harness durable and suited for intensive use. The identification panel is also reinforced so you can track the harness throughout its lifespan.

The ventral attachment point is gated for optimal connection of the DUAL CANYON GUIDE lanyard, a cutaway sling, or a CROLL S or L chest ascender.

Semi-rigid, wide waistbelt provides support and comfort.

The identification panel is integrated in the harness, to better track the equipment throughout its lifespan.

CANYON CLUB

Easy-to-use harness with integrated protective seat for canyoning

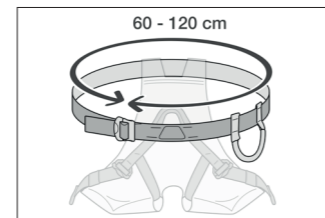

A simple solution for your first canyoning experience! Designed for group use or learning, the CANYON CLUB is a harness that's easy to put on and adjust. A single attachment point makes connecting gear quick and easy. It is durable and interchangeable, and its seat effectively protects the wetsuit and harness webbing from abrasion. The attachment point and gear loops are reinforced for excellent durability, even during intensive use. The identification panel is also reinforced so you can track the harness throughout its lifespan. Numerous accessories (protective seats in different colors, removable foam, and equipment holders) are available to personalize your equipment and improve comfort, depending on your needs.

Single attachment point with green color coding and connection indicator for efficient donning and quick visual check.

Reinforced gear loop to clip the DUAL CANYON CLUB lanyard carabiner, and secondary loops to quickly stow a descender.

Single size, adapts to most body types.

Essential for activities at height, Petzl helmets are suited for regular and intensive use. Protective and durable, they are also comfortable and easy to adjust. Their design allows for simple maintenance and storage.

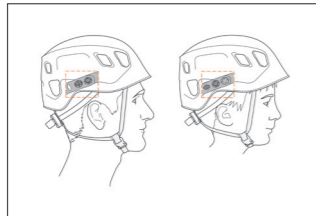

PANGA® Easy-to-use and durable helmet

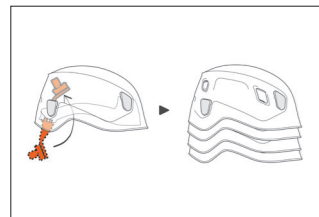

The PANGA is a durable, easy-to-use helmet designed for use in groups. The FLIP&FIT system allows the headband to be positioned low on the head, offers a secure fit, and can be easily adjusted by the instructor or participant. The single-size helmet can be adjusted to fit smaller heads and makes equipment management easier. The thick shell is designed to resist impacts and scratches. The headband folds away for protection during transport or storage. The headband is completely removable and interchangeable, making maintenance easier and optimizing its lifespan. PANGA is available in five colors and comes in packs of five.

The FLIP&FIT system allows the headband to be positioned low on the head, allowing for a more secure fit. The system allows the headband size to be easily adjusted by an instructor or user.

Lateral adjustment allows the headband size to be reduced and makes it easier to keep the helmet centered on smaller-sized heads.

The headband folds away for protection during transport or storage.

The headband is completely removable and interchangeable, making maintenance easier and optimizing its lifespan.

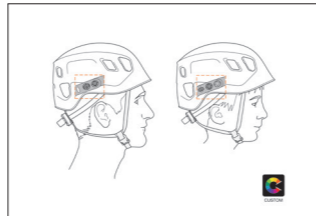

PANGA® CUSTOM Customizable PANGA helmet

Petzl Custom offers customized PANGA helmets. They come in a choice of shell colors and include a pre-adjusted size option. Stickers with a logo and/or personalized markings can be printed.

Petzl Custom offers customized PANGA helmets. They come in a choice of shell colors: orange, white, blue, green or red.

The headband can be pre-adjusted to a standard or small size.

Stickers with a logo and/or personalized markings can be printed.

With a range of products designed for rock climbing, via ferrata, canyoning, and adventure parks, Petzl belay/rappel devices are great tools to help limit risk for your clients. With instructional markings, they are easy to install and can be used with different diameter ropes.

PIRANA GUIDE

Adjustable friction descender with spur and locking slot for canyoning

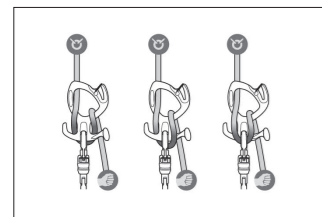

Stay in control during the entire descent! The PIRANA GUIDE is an adjustable friction descender for canyoning, intended for independent users and guides: It has three rope installation options and allows you to adapt the degree of friction before initiating a descent. A friction spur allows the user to increase braking power during descent. The plastic ring keeps the connector positioned properly to facilitate rope installation while the device is connected to the harness, limiting the risk of dropping the device.

Plastic ring keeps the connector positioned properly to facilitate rope installation while the device is connected to the harness, limiting the risk of dropping the device.

Friction spur allows the user to increase braking power during descent.

Three rope installation options to select the degree of friction before initiating a descent.

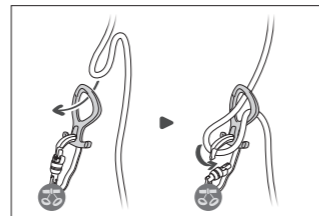

A locking slot and an additional spur facilitate rapid creation of a tie-off.

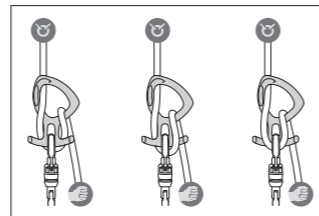

PIRANA CLUB

Adjustable friction descender for canyoning

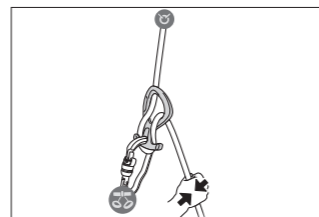

For your first canyoning experiences! Designed for group use or learning, the PIRANA CLUB is an adjustable friction descender for canyoning. It has three rope installation options and allows you to adapt the degree of friction before initiating a descent. It works well when used right-handed or left-handed. The plastic ring makes rope installation easier, keeping the device connected to the harness and limiting the risk of dropping the device.

Plastic ring keeps the connector positioned properly to facilitate rope installation while the device is connected to the harness, limiting the risk of dropping the device.

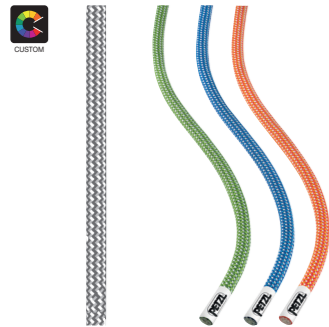

Three rope installation options to select the degree of friction before initiating a descent.

Sleek design to make instructions and visual inspections easier for the guide.

Petzl offers a choice of static, low stretch, and dynamic ropes, suited for a variety of activities in the gym, as well as outside, and designed to withstand intensive use.

LEAD 9.8 mm CUSTOM

9.8 mm diameter dynamic rope for lead and top rope climbing

The LEAD 9.8 mm CUSTOM dynamic rope is designed for top rope or lead climbing. The diameter and flexibility offer good handling for beginners and make it easy to use with belay devices. It is available in three colors. The length, terminations, and connectors are customizable to meet the precise needs of the structure. This rope is not suitable for permanent top rope climbing.

TOP 9.8 mm CUSTOM

9.8 mm diameter low stretch kernmantle rope for top rope climbing

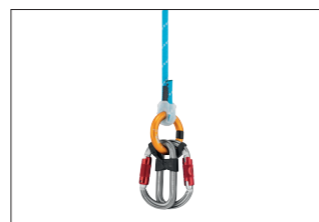

The TOP 9.8 mm CUSTOM low stretch kernmantle rope is designed for continuous top rope use. Low rope stretch reduces the risk of a ground fall within the first few meters of climbing and makes it easier to take up slack when belaying. The diameter and flexibility offer good handling for beginners and make it easy to use with belay devices. It is available in three colors. The length, terminations, and connectors are customizable in order to meet the precise needs of the structure. This rope is not suitable for lead climbing.

Termination with STUART accessory and SWIVEL OPEN, for attaching the rope at the base of the route.

Termination with STUART accessory and SWIVEL OPEN, for attaching the rope at the base of the route.

Termination with the STUART accessory, a RING OPEN gated ring, two Am'D TWIST-LOCK connectors equipped with CAPTIV positioning bars, allowing a climber to connect themselves.

Trolleys for adventure parks and pulleys for hauling heavy loads or performing a self-rescue.

TRAC GUIDE

Durable trolley for adventure parks in humid and salty environments

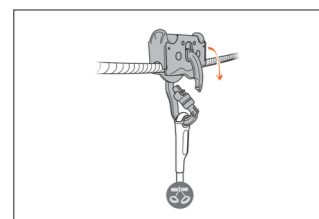

The TRAC GUIDE is a trolley designed for adventure parks. Featuring an ergonomic captive carabiner, it allows staff to quickly install the trolley on the cable with one hand. Because the carabiner pivots, the trolley remains in position on the cable when it makes contact with the end brake of the zipline. The ends are equipped with protective impact surfaces to reduce the risk of pinched fingers, and two connector support grooves to help avoid abrasion from the cable. The JOKO and AVENTEX lanyards are directly integrated with the carabiner, limiting the risk of separation or loss. The carabiner's reinforced construction provides greater resistance to humid and salty environments. Product lifespan is optimized with highly durable bearings and removable impact surfaces available as spare parts.

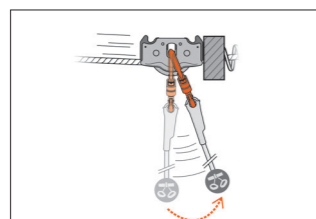

TRAC CLUB

Durable, easy-to-use trolley for adventure parks

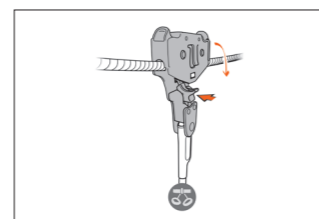

TRAC CLUB is an easy-to-use trolley designed for adventure parks. It is ergonomic, with excellent grip, and allows the client to install the trolley on the cable with one hand. The ends are equipped with protective impact surfaces to reduce the risk of pinched fingers, and two connector support grooves to help avoid abrasion from the cable. The JOKO and AVENTEX lanyards are directly integrated in the trolley, limiting the risk of separation or loss. Product life is extended with extremely durable bearings and removable impact surfaces available as spare parts.

The ergonomic captive carabiner allows staff to very quickly install the trolley on the cable with one hand.

Because the system allows the carabiner to pivot, the trolley remains in position on the cable when it makes contact with the end brake of the zipline.

The ergonomic opening system allows the client to easily install the trolley on the cable with one hand.

Excellent grip makes it comfortable for the client to use.

Two positioning support grooves for the connectors limit abrasion from the cable.

The trolley connects easily to the harness with the CARITRAC stowing accessory (included).

The trolley connects easily to the harness with the CARITRAC stowing accessory (included).

For via ferrata, adventure parks, canyoning, or climbing, a lanyard is an essential piece of protective gear for your clients. Petzl offers a range of products designed to meet the specific needs of each of these activities.

SCORPIO® EASHOOK SW

Via ferrata lanyard with EASHOOK carabiners and swivel

The ideal lanyard for taking on breathtaking via ferratas. The SCORPIO EASHOOK SW is a lightweight, compact, and very comfortable lanyard. With an ultra-compact absorber and two elastic arms, you can move through the course with ease. An integrated swivel keeps the arms from tangling, keeping you comfortable as you move through the course. Designed for a wide range of hand sizes, the ergonomic EASHOOK carabiners provide optimal grip for easy handling when passing intermediate anchors. The lanyard is equipped with a short arm that allows you to install a carabiner (not included) so that you can easily rest on a rung on the via ferrata course.

SCORPIO® VERTIGO

Via ferrata lanyard with VERTIGO carabiners

At only 365 g, the SCORPIO VERTIGO is the lightest in the Petzl range of via ferrata lanyards! With an ultra-compact absorber and two elastic arms, you can move through the course with ease. Easy to use, the VERTIGO WIRE-LOCK carabiners provide excellent grip and have a large opening so you can quickly clip and unclip from cables. The lanyard is equipped with a short arm that allows you to install a carabiner (not included) so that you can easily rest on a rung on the via ferrata course.

JOKO ADJUST CUSTOM

Customizable adjustable rope lanyard for adventure parks

JOKO ADJUST CUSTOM is an entirely customizable adjustable rope lanyard equipped with an ADJUST rope adjuster and designed for adventure parks. Easy-to-use, the lanyard allows the user to attach the mobile connection device to the harness and can be adjusted to fit the user. The ends are equipped with a plastic sheath to protect the stitching from abrasion. Petzl Custom can customize the lanyard's color and length, and offers a choice of a single or double arm. Customers can also choose from different terminations and harness connection types. Additionally, connectors and TRAC trolleys can be pre-installed for a ready-to-use solution.

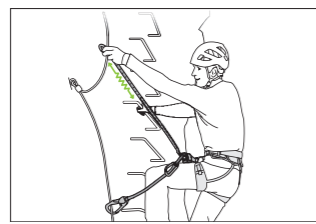

JOKO CUSTOM

Customizable rope lanyard for adventure parks

JOKO CUSTOM is an entirely customizable rope lanyard designed for adventure parks. Easy-to-use, this lanyard allows the user to attach the mobile connection device to the harness. The ends are equipped with a plastic sheath to protect the stitching from abrasion. Petzl Custom can customize the lanyard's color and length, and offers a choice of a single or double arm. Customers can also choose from different terminations and harness connection types. Additionally, connectors and TRAC trolleys can be pre-installed for a ready-to-use solution.

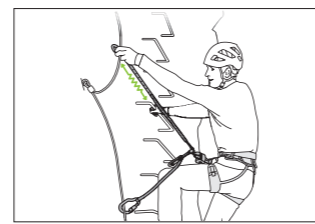

Ultra-compact energy absorber reduces bulk for ease of movement.

Long extension capacity and elastic arms for easier progression and to adapt to different user heights.

Ultra-compact energy absorber reduces bulk for ease of movement.

Long extension capacity and elastic arms for easier progression and to adapt to different user heights.

The SCORPIO EASHOOK SW is equipped with a swivel that keeps the arms from tangling during use. It features a short arm where a carabiner can be installed and used to easily rest on a rung (carabiner not included).

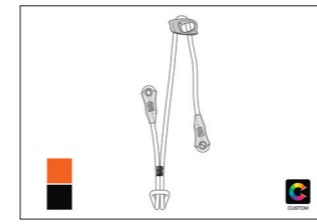

Ergonomic EASHOOK are designed for a wide range of hand sizes and easy to handle when passing intermediate anchors.

A carabiner can be installed on the short arm and used to easily rest on a rung (carabiner not included).

The ergonomic VERTIGO WIRE-LOCK carabiners provide excellent grip.

Petzl Custom offers the lanyard with a single or double arm, as well as the choice of color in orange or black.

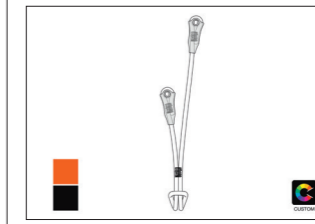

The lanyard can be customized to a specified length (5 cm increments, from 25 to 200 cm).

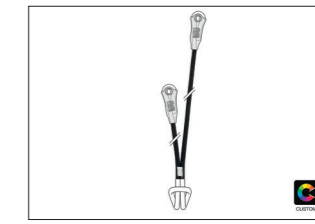

A selection of terminations and harness connection types is available: Sewn termination, girth hitch or ADJUST rope adjuster.

Connectors and TRAC trolleys can be installed, for a ready-to-use solution.

The lanyard can be customized to a specified length (5 cm increments, from 25 to 200 cm).

A selection of terminations and harness connection types are available: Sewn termination and girth hitch.

Connectors and TRAC trolleys can be installed, for a ready-to-use solution.

DUAL CANYON GUIDE

Adjustable double lanyard for canyoning

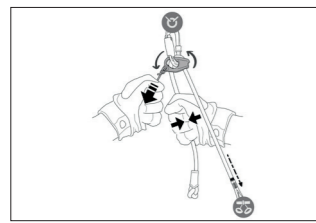

Designed for canyoning, the DUAL CANYON GUIDE is an easy-to-use, adjustable lanyard for independent users and guides. It allows progression on a lifeline with intermediate anchors and optimal positioning at an anchor. It attaches directly to the pin of the gated attachment point on the CANYON GUIDE harness. The ADJUST rope adjuster has an ergonomic shape that allows for quick and easy length selection of the adjustable arm.

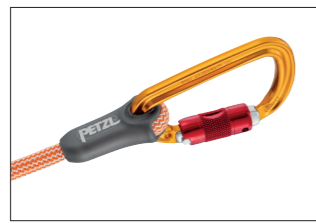

Attaches directly to the pin of the gated attachment point on the CANYON GUIDE harness, reducing bulk.

The ADJUST makes it quick and easy to lengthen or shorten the adjustable arm.

ADJUST features a hole for attaching a cord to more easily unblock the lanyard rope when it is weighted.

The ends are equipped with a plastic sheath to help protect the stitching from abrasion.

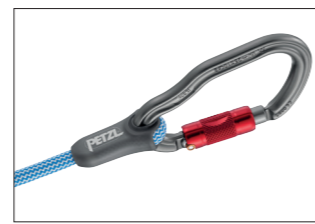

DUAL CANYON CLUB

Double lanyard for canyoning

Designed for canyoning, the DUAL CANYON CLUB is an easy-to-use lanyard for groups or beginner canyoneers. It allows progression on a lifeline with intermediate anchors and positioning at an anchor. It attaches easily to the CANYON CLUB harness with a simple girth hitch. The ends are equipped with plastic sheaths that resist abrasion and hold the carabiners in place.

Installs easily on the CANYON CLUB harness with a simple girth hitch.

Ends equipped with plastic sheaths to help hold the carabiners in place and protect the stitching from abrasion.

Petzl offers multiple anchors designed to equip your structures, inside or outside. Whether it's made of steel, multidirectional, in the form of a rigging plate or webbing, these products demonstrate a commitment to quality for your teams and clients.

TIPTOP STAINLESS

Durable top anchor carabiner for exterior use

TIPTOP STAINLESS is a top anchor carabiner designed for outdoor climbing walls. Its aluminum gate and large opening make it easier to clip the rope. The stainless steel frame and hard anodized gate optimize durability. It is easy to install on an existing anchor.

TIPTOP STEEL

Durable top anchor carabiner for interior use

The TIPTOP STEEL is a top anchor carabiner designed for indoor climbing gyms. Its aluminum gate and large opening make it easier to clip the rope. The steel frame offers great durability. It is easy to install on an existing anchor.

EASYTOP[®] STAINLESS

Ergonomic and durable top anchor carabiner for exterior use

EASYTOP STAINLESS is a top anchor carabiner designed for outdoor climbing walls. The carabiner design makes clipping easy. The stainless steel frame and the locking system optimize durability. The inspection pin (included) allows operators to rapidly inspect the function and wear of the equipment.

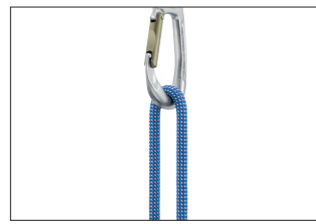

EASYTOP[®] STEEL

Ergonomic and durable top anchor carabiner for interior use

EASYTOP STEEL is a top anchor carabiner designed for indoor climbing gyms. The carabiner design makes clipping easy. The steel frame and the locking system are extremely durable. The inspection pin (included) allows operators to rapidly inspect the function and wear of the equipment.

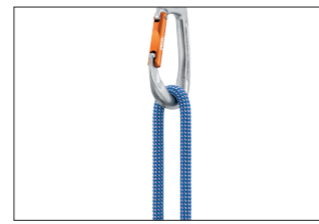

Aluminum gate gives it the feel of clipping a quickdraw.

Wide and rounded basket helps preserve the rope from wear.

© 2022 Petzl Distribution - Lafouche

Backed by many years of experience in the field, Petzl offers an innovative range of packs and accessories for climbing, canyoning, hauling, or transporting equipment.

ALCANADRE GUIDE 45

Ergonomic and comfortable canyoning pack

The key to carrying everything you need! ALCANADRE GUIDE is a 45-liter canyoning pack designed for independent users and guides. With generous padding, it provides optimal comfort during approaches or while moving through the canyon. Numerous drain holes easily evacuate water. It has two colored loops for attaching the rope ends, a removable waistbelt, and buckles on each shoulder strap quickly release the pack in an emergency situation. Inside, two compartments give you direct access to a waterproof container and to the rope, a flat pocket for rescue equipment, and a mesh pocket for storing small items. Its construction and reinforced upper handle provide additional durability.

ALCANADRE CLUB 30

Easy-to-use canyoning pack

Ready to help you discover incredible canyons! Designed for group use or learning, the ALCANADRE CLUB is an easy-to-use 30-liter pack. Padded shoulder straps offer great comfort during the approach. The large opening makes it easy to store and remove the rope. Numerous drain holes easily evacuate water. Inside, three color-coded loops allow you to attach the rope ends and rescue equipment. On each shoulder strap, buckles allow you to quickly release the pack in an emergency situation. Its construction and reinforced upper handle provide additional durability.

YARA GUIDE 25

Medium-capacity rope bag for canyoning

YARA GUIDE 25 is a medium-capacity canyoning rope bag designed for independent users and guides. It can transport a rope, keep it from tangling with other equipment, and facilitate maneuvers at the anchor or when installing a fixed line. The padded back provides buoyancy and two handles improve handling. Multiple drain holes optimize water evacuation. Its construction and reinforced upper handle provide additional durability.

YARA CLUB 15

Small-capacity rope bag for canyoning

YARA CLUB 15 is a small-capacity canyoning rope bag designed for groups. It can transport a rope, keep it from tangling with other equipment, and facilitate maneuvers at the anchor or when installing a fixed line. The padded back provides buoyancy and two handles improve handling. Multiple drain holes optimize water evacuation. Its construction and reinforced upper handle provide additional durability.

Back, shoulder strap and waistbelt padding provides optimal comfort during long approaches.

Webbing functions when the flap is open or closed and allows the pack to be tethered efficiently in a variety of situations.

Cord lock makes it easy to close.

Multi-position webbing allows the pack to be tethered efficiently in different situations.

Cord lock makes it easy to close.

Drain holes in sides and bottom evacuate water efficiently.

Cord lock makes it easy to close.

Drain holes in sides and bottom evacuate water efficiently.

Lower compartment can be opened for access to a waterproof container.

Two color-coded loops inside for attaching the rope ends.

Drain holes in sides and bottom evacuate water efficiently.

Three color-coded loops inside the pack for attaching the rope ends and rescue equipment.

Two color-coded loops inside for attaching the rope ends.

Molded upper handle and front handle make it easy to throw and pass the bag.

Two color-coded loops inside for attaching the rope ends.

Molded upper handle and front handle make it easy to throw and pass the bag.

Exploring New Horizons

The Petzl Foundation's mission is to support and initiate public interest projects through its activities in mountainous and vertical domains; projects that help bring balance to humankind's place in its natural, cultural, and economic environments. The foundation supports non-profit organizations through financial and equipment grants, as well as consultation and training.

Our Focus

Prevent accidents in vertical environments

Support ecological transition in mountainous areas

Encourage mountain exploration

Sharing the Mountains

The Petzl Foundation helps those in marginalized communities who are in the process of social reintegration or affected by illness to explore mountains and the vertical world.

While organizations may not be able to reverse policies that are unfavorable to the most vulnerable, through mountain recreation they can attempt to bring comfort and a new start to people excluded from school, work, or society. The Petzl Foundation supports organizations in France and across the globe that facilitate access to mountain recreation, help young people from working-class neighborhoods integrate into the professional world, and welcome refugees.

The Healing Power of Nature

According to numerous scientific studies, physical activity and connection with nature have beneficial therapeutic effects. We support organizations that provide mountain excursions for people living with or recovering from cancer. The goal is for these people to feel re-energized with self-confidence and well-being, which are often affected during long periods of treatment.

These programs account for 30% of our total support for organizations (approximately €130,000 per year).

Learn more about the organizations we support:

- 82-4000 Solidaires
- En passant par la montagne
- Les Enfermés Dehors
- Seuil
- Projets en Cimes
- Sport dans la Ville
- Ascend Athletics
- Weavers
- BivouacEtMoi

Bivouac et Moi is an organization that offers mountain adventures to people undergoing cancer treatment.
